

Community Guidelines

Clear guidance for safe, respectful, and useful conversation.

VERSION	1.0 · Protected staging · August 23, 2026
CANONICAL HTML	https://ifocusplus.app/en/community-guidelines/

Staging version: These Guidelines currently apply only to the owner and authorized administrators using labeled test content. No public Community service is operating.

Community Guidelines

1. Respect and safety

No insults, threats, intimidation, harassment, sexual advances, hate speech, or demeaning treatment based on origin, skin colour, gender, identity, religion, disability, age, or sexual orientation.

2. Privacy first

Do not publish another person's address, private contact details, credentials, health information, location, or confidential messages. Doxxing and attempts to identify people will normally result in immediate suspension.

3. Protection of minors

Sexual or exploitative content involving minors, grooming, dangerous contact attempts, and collection of minors' personal information are strictly prohibited. Suspected cases receive priority review and are referred where legally required.

4. Law and third-party rights

Post only material you may share. Illegal content, copyright copies, trade mark misuse, defamation, fraud, malware, circumvention instructions, and calls for violence or crime are prohibited.

5. No spam or manipulation

No bulk advertising, affiliate floods, repeated posts, artificial engagement, multiple voting accounts, bots, or paid reviews. Mention your own projects only where relevant and transparent.

6. Make contributions useful

Use a clear title, explain the goal and context, mention what you tried, and stay on topic. Label assumptions, concepts, and AI-generated material where omission could create a false impression.

7. Reactions and votes

A like recognises; helpful rates practical usefulness. Not helpful is not a punishment. Coordinated downvoting, retaliation, and manipulation are prohibited.

8. Report, do not escalate

Use the report route for possible rule violations or illegal content and identify the exact content and reason. Do not weaponise reports to suppress opinions. Contact police or emergency services in immediate danger.

9. Do not imitate professional advice

Label personal experience and refer people to qualified professionals for health, legal, financial, or security questions. iFocus Plus and the Community are not emergency, diagnosis, or advisory services.

10. Possible action

Depending on severity: guidance, correction request, labelling, moving, reach limits, removal, temporary posting limits, or suspension. Serious threats, doxxing, exploitation, fraud, or evasion may result in immediate removal and suspension. Review is available.
